## AGRI-GIS

## TRAINING PROGRAM FOR ENHANCING THE MANAGEMENT AND ANALYSIS OF GEOGRAPHICAL INFORMATION BY AGRICULTURE TECHNICIANS

# Press Release #1

### Welcome to AGRI-GIS Project!

We are pleased to announce the launch of AGRI-GIS, a new European project co-funded by the Erasmus+ Programme under KA220-VET.

AGRI-GIS focuses on strengthening the digital competences of agriculture technicians and trainers, with particular emphasis on the practical use of Geographical Information Systems (GIS) to support sustainable and climate-smart agriculture. The project responds to current challenges faced by the agricultural sector, including climate change, resource management and the growing need for data-driven decision-making at farm level.

### Key Objectives

The main objectives of AGRI-GIS are to:

- develop an innovative training methodology for agriculture technicians focused on the practical application of GIS tools,
- create training resources and case studies based on real agricultural challenges in different European regions,
- produce a Guide for Trainers to support VET educators in delivering and replicating GIS-based training,
- ensure wide dissemination, impact and long-term sustainability of project results across the agricultural and VET sectors.

### Project partners

AGRI-GIS is implemented by a European consortium composed of:

- Universitat Politècnica de València (Spain) – Coordinator
- Fundación para la Promoción de la Agricultura Agronómica (Spain)
- The Polish Farm Advisory and Training Centre Natalia Truskowska (Poland)
- Czech University of Life Sciences Prague (Czechia)
- International Academy of Applied Sciences in Łomża (Poland)
- University of Novi Sad (Serbia)
